

# AFTERMARKET REFERENCE FOR CATALOGING SOLUTIONS

## One Provider For All Your Catalog Needs

JNPSOFT is the only one-stop shop for all your North American cataloging needs. Trusted by auto part suppliers in the Americas, Europe and Asia, it provides a full line of solutions to facilitate the entry and maintenance of product and fitment information in industry-standards, and its delivery in electronic formats.

OE Data | Product Information Management System | Data Management  
Web Catalog | Visual Asset Management Tool

Clean and precise OE information. Our research groups analyze and retrieve data from OE spare parts systems, connecting OE references with the corresponding North American applications.

A DIY PIM system that allows content specialists to maintain all their catalog content in-sync with the ACES, PIES and NAPA formats, and generate standard electronic files for all data receivers.

Built in PartCat, IMAGO facilitates the maintenance of digital assets. It allows you to maintain only one set of images and create copies based on your receivers' requirements.

A web platform to make your catalog content accessible to all counterpartors and auto-shops around the world. No more PDF or Excel downloads. Supports 360 Images, live updates and VIN lookup.

With a combined 30 years of experience in the aftermarket, our Data Management team ensures the mapping, maintenance, and delivering of its partners' catalogs - as it was its own.
