

## About PDM Automotive

PDM Automotive was founded in 2017 on the principle that creating, distributing and consuming high quality automotive product data should be easy, transparent and improve sales. We exist to create experiences where brands feel empowered to take charge of their own data, resellers seamlessly have access to all product information in real-time, and service providers can add their own special contributions to the process. We do this by engaging with like-minded organizations, listening, and utilizing the latest technologies to create an intuitive platform for the flow of high-quality automotive product data between all our customer's trading partners.

**Taking the pain out of high-quality automotive product data exchange!**

# Features and Benefits

## Better Product Data for Better Sales

- Single source of data for all your channels
- PDM assures compliance with ACES and PIES
- Backed with Auto Care table/data/structure
