GENERAL MEMBERSHIP AND SPECIALTY COMMUNITY DESCRIPTIONS

When companies join Auto Care Association, they are automatically enrolled as **General Members** of the association and receive access to all of the industry-wide benefits that Auto Care Association has to offer. At the same time, since Auto Care Association's members are diverse and represent many different product lines and areas of expertise within the industry, some may choose to be part of a more specific community within the Auto Care Association. Communities are composed of Auto Care Association members that share similar interests, product lines and/or business functions. When a new company joins the Auto Care Association, they have the option to join a community that best represents their specific area of interest within the motor vehicle aftermarket/auto care industry. Conversely, the member may choose to receive all common Auto Care Association benefits as a **General Member**, without joining a community. Auto Care Association communities generally feature their own governance, committee representation and unique issues and interests. In addition, several communities sponsor their own conferences and events. Members may select one or more of the following communities. If desired the first community (if any) is included in the base membership dues. Additional communities may be added as a Plus Membership Community for only \$400 each.
